THE STEALING OF THE SABINE WOMEN FROM THE PAINTING IN THE LOUVRE BY DAVID.

STEALING OUR PRETTY ALASKAN BELLES—As the Sabine Women Were Stolen by the Ancient Romans

A FAVORITE subject of the painters of the eighteenth century was the stealing of the Sabine women by the Romans; and a picturesque parallel for modern painters may be found in the shocking practices of the Arctic whalers, who have carried into captivity thousands of native Alaskan women. The United States Government has at last determined to stop this mischief. More than a hundred years ago the whalers began the practice of luring native young women on board their ships during the long, lonesome Arctic winter. The half-bred daughters of these women, who were half white and sometimes very pretty, were sought out by the whalers of the next generation, and this process has proceeded until the native Alaskan blood has been widely mixed with the blood of whalers of every nationality. All this has been related by the native men, and the whalers have had to resort to cajolery, presents of feminine finery and often to violence.

The favorite method of the whalers is to bring on shore picture books and set works showing gaudily dressed women of Paris, London and New York. Then follow presents of high-heeled shoes, of brightly colored stockings, of cheap but sturdy dresses and hats. Charmed with these bright clothes, the unfortunate girls are lured from their villages to the beach with promises of more finery—and struggling in the arms of the brazen whalers they are tossed into the boats and hurried on board the ships. The prettiest girls, the belles of the village, are the ones, of course, who suffer most.

The Government authorities have been stirred up by a report on the subject which has just reached Washington from Captain O. C. Hamlet, of the Revenue Cutter Service. It should be understood that the Revenue Cutter Service is the navy of the Treasury Department; and it is the Treasury that manages the affairs of Alaska. Incidentally, it is responsible for the safety and welfare of the native women of our Arctic province, and it intends to see that they are not stolen or otherwise maltreated.

The story is rather a long one, and involves a good many interesting details—which is not surprising in view of the fact that the beginning of it dates back at least a century, as already stated. Quite as long as that ago it began to be the custom to steal girls not only from Alaska, but from the Siberian coast, and to carry them off on board of whaling ships. Ever since then this kind of piracy, or, expressing it all in what you will—has been going on; and of late years hundreds of Alaskan girls have been thus kidnapped.

The Alaskan girls in question with white blood in their veins are usually plump, bright and rather attractive. In former days they were remarkable for their strict virtue. The lives of whalers in Arctic seas are rude and laborious, but, compared with the Eskimo, they roll in the lap of luxury. To Eskimo means the ships are beautiful and interesting. It is not surprising that they should go aboard—especially if enticed with a few pretty beads, a hand mirror, a brush and comb, and oftentimes violence. This sort of thing became more common as time

went on, and lately it has been a not infrequent practice, on trips lasting many months, to transfer young women from vessel to vessel, establishing a sort of system of exchange.

For at least a hundred years this sort of thing has been going on, and the American shores of Bering Sea are called upon nowadays to furnish a regular crop of girls to supply the whaling ships. It is a traffic most disastrous in its effects, of course, ruining young women by wholesale and breaking up, to a great extent, the home life of the native people. Together with rum, it has gone far to utterly demoralize both the Chukchee and the Eskimo.

It should be explained that the Chukchee are the people who dwell along the eastern border of Arctic Siberia. They are considerably more civilized than the Eskimo, but somewhat in their habits, depending for their subsistence chiefly upon herds of reindeer. In winter they occupy villages some distance inland, but in summer they come down, with their reindeer, to the coast, mainly for the purpose of fishing. More hardy and peaceful folk there never were.

If, on the other hand, we consider the case of the whalers, it appears that they are a pretty bad lot. They are, so far as the crew are concerned, mostly adventurers in more or less hard luck, law-breakers graduated from prisons, deserters from various branches of the Government service, and so forth, with a liberal sprinkling of the worst class of Portuguese and South American negroes. A small minority is composed of unlettered "green hands."

Such are the human creatures of prey who have been so long permitted to kidnap and carry off for their own purposes the Chukchee and Eskimo maidens. So long as it was the Siberian natives only who suffered, our own Government did not feel called upon to interfere; but now that the stealing of Alaskan girls has assumed such extensive proportions, the American authorities have decided to do something. Naturally, it was the missionaries who first called attention to the growing evil, inasmuch as considerable numbers of the young women attend the missionary schools. And, finally, the business was taken up in earnest by Captain Hamlet, commanding the United States revenue cutter *Thetis*, who is

also Commissioner for the Second Division of the District of Alaska. It is he, as already stated, who has waked up the authorities in Washington by his report on the subject.

The legal aspect of the case is somewhat puzzling. In the first place, the vessels concerned in the illicit traffic are of many nationalities, only a minority of them flying the American flag. Secondly, in order to punish the offenders under the provisions of the Navigation act, it would be necessary to prove that the young women were passengers on board of the ships—a thing hardly practicable, their present status being somewhat hard to define. What seems to be needed is some new enactment by Congress, specially adapted to cover the matter, and this will doubtless be asked for at a near date.

So stern an attitude, however, has been assumed by the Federal authorities in dealing with the whalers on the subject that a number of the latter attempted last Autumn to disembark Eskimo women, together with children, at Point Barrow, which is the most northerly point of Alaska—hoping to provide them with assistance for the winter by having on shore a store of provisions and erecting suitable huts for their accommodation. This was not permitted by the agents of the Revenue Cutter Service, on the ground that the victims came left to shift for themselves would inevitably be obliged to undergo severe hardships. It was decided for this reason to direct the whalers to take back the women and children to the villages where they properly belonged, with the understanding that they were not to be rescued again therefrom next year or at any time subsequently. This order has been carried out.

As might be supposed, the young women taken on board of the whaling ships do not as a rule become the property of members of the crew (who

KINDNESS is the key that unlocks the closed door of a woman's heart. Love and forgiveness and always love always wants to be popular with all. It is the key to success with one woman or a hundred.

We hear and read a great deal about women owing the love of her nation. The trouble begins in the substitution of life may be easier to give than when the great redemption recall first kindness. They may not give an outward sign of it, but from the moment the trouble begins to a woman that moment her love begins to flow. In kindness and love it is liable to be over.

A kindness is a rare "personality" so that a man with a natural pleasantness or virtuosity. The man who is slovenly, or very careless is never a favorite. He must be scrupulous as to his teeth and nails, and he must exercise frequently, especially with his clothes brush, his trousers must be pressed and ironed, his high hat neatly polished, his coat very pretty but not gaudy, he must wear a boutonniere, and his shoes must be kept in good condition.

Blonds are not popular with the opposite sex. It is men with brown hair and gray or blue eyes who are most welcome suitors.

SAM LOYD'S PYRAMID PUZZLE

HERE we have an interesting puzzle of old Egypt. In the picture we see an old time Egyptian king, who holds in his hand the form of a pyramid in one piece, while at his feet is another pyramid made up of three pieces.

The idea of the puzzle is to fit the four pieces together so as to make one large pyramid—that is, with the pyramid in the old king's hand and the other pyramid at his feet, which is made up of three pieces, put the four pieces together and form one big pyramid.

To 1,000 of our little readers who send us in the correct answer we will mail a pretty puzzle book, if they will send their answers to

EDITORIAL SECTION

BOSTON AMERICAN, SUNDAY, MARCH 3, 1907.

WHAT CHANCE IN LIFE HAD THIS MAN?

THERE are on this page three pictures—pictures of human life as unearned, inherited money PERVERTS HUMAN LIFE.

There are here and there men in the world who can rise up and BE MEN, even under the handicap of great inherited wealth, acquired in early life.

But the men that succeed IN SPITE OF WEALTH are so few that they can be counted almost on the fingers of the hand. They are not one in a thousand that compare with those that succeed IN SPITE OF POVERTY.

There are men that long foolishly and idly for the great fortunes of which America talks and for which America struggles.

There are others, loving but misguided fathers and mothers, that long for great fortunes to leave to their children. All of those whose minds are fixed upon great sums of money, whether for themselves or for their children, are invited to study and to think on their own account of the three pictures on this page.

WHAT DOES TOO MUCH MONEY DO FOR CHILDHOOD?

It kills the child's imagination. He is overwhelmed with presents; everything he wants and more than he wants he can have AND MUST HAVE.

Foolish luxury, foolish toys, foolish, servile servants, foolish flattery—all these warp his little mind, magnify his childish self-importance.

The father spends his money TO MAKE THE CHILD HAPPY, BUT HIS CHILD GETS INFINITELY LESS FROM ALL THE MONEY THAN ANOTHER CHILD GETS FROM A RAG DOLL, FROM A TURTLE FOUND IN THE FIELD OR A SHELL PICKED UP ON THE SHORE.

Tired of life before life has really begun, cheated out of the mental growth, the spiritual excitement that the child should find in devising his own interest, and seeking its own amusement, the unhappy child of those that are foolish and too rich goes from a babyhood of boredom into a young manhood of satiety and mental dullness.

Who has not seen the tired, listless, drooping, false-living young men THAT NEVER KNEW WHAT IT WAS TO TRY OR TO NEED TO TRY?

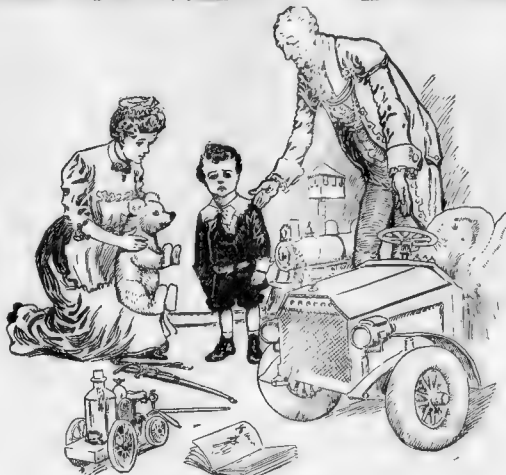

These young men drag themselves over the earth, spending as they go the money that does not make them happy, and that brings happiness to no one else.

They can HAVE everything, and therefore THEY WANT NOTHING. They cannot tell real friends from false. Usually they have no friends—but parasites instead of friends. They are not hungry; they are not thirsty, or at least not normally so.

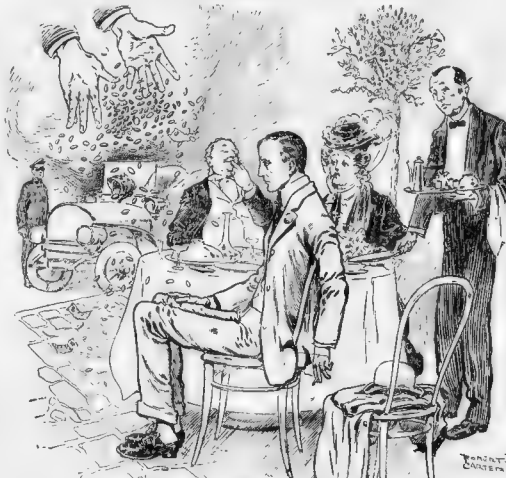

They have worn out and exhausted every attraction and every feeling before it was half developed. They find even vice tiresome and self-indulgence a bore. They may well envy the daily work of the meanest man that waits upon them, AND THAT NEEDS THE MONEY HE EARNS.

The lives of such young men are made desolate by too much. Their cheated childhood is followed by a disappointed, cheated manhood.

And then comes at last old age, disillusion, complaints about the world and about life. The money is there still, perhaps, and the checkbook works its mira-

"Robbed of His Childhood by Foolish Luxury"

"Robbed of His Young Manhood by Wasting Satety"

"Robbed of Old Age's Comforts by Absence of Friends and Absence of Purpose"

BE USEFUL OR YOU MUST BE UNHAPPY

cles. But miracles of the checkbook are very tiresome at the end of long years. Nobody need envy the rich, useless, idle old man whose old age follows upon an idle childhood and an idle youth.

Such a man in his last day may well stretch out his hand to death as almost the first real and sincere friend he has known. This friend will at least take him away for himself, wipe out the slate that has only self-indulgence, satiety, disappointment written upon it, and give the tired soul a chance to begin on a new and clean page.

There is more excitement and happiness in doing one simple piece of work well than in spending all the useless money that ever was left to a useless child.

The man with a hundred millions may cheat the people, deceive himself, dodge the laws, BUT HE CAN'T CHEAT NATURE OR DO AGAINST HER LAWS.

To every man and woman in the world there is a law that says every day, "YOU MUST BE USEFUL OR YOU MUST BE UNHAPPY."

Only in real activity of the mind can real enjoyment of life be found. The man digging a ditch honestly, hungry for his simple meal when the hour comes, is a far happier creature than the self-indulgent, idle bore, a perpetual spender of money earned by others.

This fact should sink into the minds of Americans, especially of young people, and it should divert our national attention from the everlasting pursuit of the superfluous dollars that mean nothing.

Every man should want to have as much as will keep him independent AND PROTECT THE WEAK THAT DEPEND UPON HIM.

Every man should look into the future and decide that his old age shall find him independent and not a slave. Every man should realize that actual poverty in old age MEANS ABJECT, PITIFUL SLAVERY.

But BETWEEN the slavery of poverty and the dull slavery of great wealth, there lies the land in which men are busy and useful, and temperate AND HAPPY.

Nobody need envy the young man, the child or the old man that has too much. But the man with too much may well envy the simplest, most modestly paid, HONEST, CONTENT WORKER IN THE NATION.

We believe that parents should impress this upon children and try to make them understand it. There is hardly a neighborhood in which you may not point out some child ruined by too much indulgence. There is not a village but has its warning in the case of some young man made useless by the foolish fondness of the father or mother giving too much money to a child or a youth.

It is the duty of older men and women to impress upon the young constantly that they can only find happiness in real achievement and in real work. And we beg our readers to think of this in talking to the young, in impressing their ideas upon them.

In the criminal court of New York city a young man is on trial for murder.

This young man is a sad illustration of the truths that we seek to convey.

He had from childhood millions. These millions turned him away from a useful life. They made real effort seem waste of time. They drove him out of the paths in which he might have found real happiness, and they have landed him at last where he stands to-day—at the end of a cheated childhood and a wasted youth.

These are but a few of the many American names that might be cited in the Old World. And then Mr. Ranger proceeded to tell me some interesting facts connected with art and commercialism. Here they are:

on others to effort. Nothing is so contagious as success. Then, when money has been accumulated, its natural use is in beautifying the world.

While the financier, the trader and the merchant are proving their prowess in the world

THREE BOSTON BRIDES BACK FROM HONEYMOON

SOCIETY NOW PLANS BRILLIANT EASTER

Dull Month Follows Numerous Functions Crowded Into Closing Days of February.

WITH the greater number of Easter week-enders the society calendar crowded into the last two weeks of February the outlook for March is extremely dull, and society people are faced with the prospect of a brilliant Easter period.

Quite the most important of the week-enders in the series which Mrs. John G. Barker is giving at the Tabor, the first on Thursday, the 21st, and the second on the 23rd.

The first will be an interpretative reading of the "Mystic Mystical" "Mystic" a poetic drama of great beauty and strength, which has been played in the city for several years, given in the city.

At the second reading Mrs. Barker will read the "Mystic Mystical" "Mystic" a poetic drama of great beauty and strength, which has been played in the city for several years, given in the city.

SMART SET FOLK QUIT CITY FOR LENT

Those few members of the smart set who remain in the city during Lent are the only ones who are left. The rest have all gone to the country or to the mountains. The smart set is a very small group of people who are very fashionable and very rich. They are the ones who are the most influential in the city. They are the ones who are the most powerful. They are the ones who are the most important. They are the ones who are the most influential. They are the ones who are the most powerful. They are the ones who are the most important.

SOCIETY SEEKS LAND OF BALMY SPRING AND PALMS

By a Society Woman.

WINTER is epidemic among members of the society, and the land of those to join the great Lenten exodus are the balmy springs and the palm trees of the south.

Here Are Some of the Wanderers.

Mrs. and Mr. Edward O. Holmes, the former a grandson of Oliver Wendell Holmes, are sailing in April to spend the winter in the south. Mrs. Holmes is a member of the society and is a very active worker.

Fair Dividends from Sunburst!

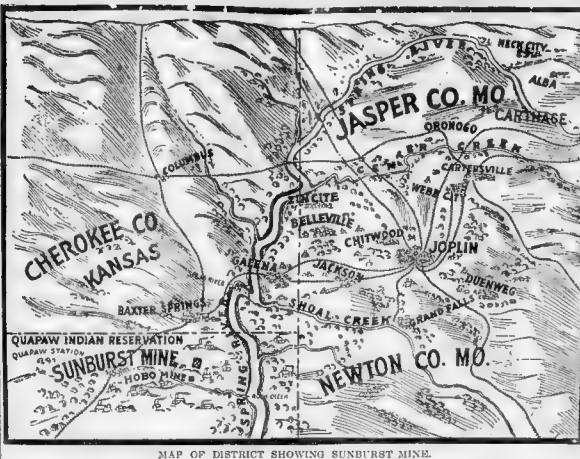

Machinery now being installed for rapid developments of underground workings of famous lead and zinc property—stockholders enthused over new strike of rich ore—steam drills and hoist operated by great power plant will bring riches from the earth—on behalf of the public, Kansas City Post investigates mine and prints magnificent indorsements of this mighty co-operative enterprise—big advance in price of stock is coming

The directors authorized the announcement that the machinery for the underground workings is now being installed. This consists of the latest type of powerful steam boiler, steam hoists and steam drills. The contract for the hoister house for Shaft No. 3 has been let and this will be erected immediately. The steam drills will give immense impetus to the work. Drifting is being pushed to connect Shafts 2 and 3, and in this work a great body of rich ore has been struck, that has created wide excitement in the camp. As this goes to press tons of rich ore are being piled up on the dump, spelling sure dividends.

This immense rich property lies four miles from Baxter Springs, Kansas, and is just across the state line in the Quapaw River basin, Indian Territory. All around are mountains, showing that property are well produced. The mines with the mills, which are making the owners rich. Just southwest is the mill owned by the Wagon Wheel Co. The property is well situated, and the reports of experts and engineers are actually richer and more abundant than at any other place in the district. The situation is one of a rich deposit of mineral of the highest quality, from 15 to 20 feet in thickness, lying at a depth of 57 to 74 feet, thus making it very easy and inexpensive to mine. Thousands of dollars were expended in drilling holes and shafts to prove not only the existence in paying quantity of lead and zinc, but also the unusual richness of the ore. The lead and zinc mines have demonstrated a uniform bed of ore to a depth of 15 to 20 feet in thickness and found only 57 feet of surface. The water is not so far from the surface as in the case of the other mines, which allows the ore to be taken out without the use of any timber whatever, pillars of ore being allowed to support the roof, which is permanently safe.

The Same Ore Body that Makes Others Rich

No other district can produce so many rich mines in so small an area as this portion of the Baxter Springs Camp. Look at the map and you will see how the Sunburst holdings are the very heart of this section. To the north are the Dark Horse, Lady, Tippecanoe, and well-known properties. To the west are the Sunburst (the oldest mill in camp), White Eagle, Indian, and others. To the south the famous Hobo (the richest mine ever opened in the district), which has produced last week by the Hobo 100 per cent. In three months 500,000 pounds of rich ore were taken out by the Hobo. This mine is 135 feet from our property and in the same ore body. Shaft No. 3 is only 70 feet from the Hobo north drift, with the same bed of ore. This drilling shows this bed to run across the entire Sunburst property. Shaft No. 3 is 400 feet from the northeast drift of the Hobo and is into the same ore body. To the south are also the Omaha Mine and Mill and the Good Luck Mine, where the lead has proved to be so heavy. On these properties mills are erected and extremely rich ore extracted, making great returns for the owners.

WHY STOCK IS NOW OFFERED AT 8c A SHARE!

This issue of fully paid non-assessable stock is for the purpose of procuring immediate funds to build a concentrating mill, equip the plant with hoisting machinery and continue development work and put day and night shifts to work—in a word, to apply to this immensely rich property the same development that is now in progress elsewhere around us in paying great dividends and enormously enhancing the value of the property. Have you ever heard of a failure in a true lead and zinc mine? Have you not heard, on the contrary, of the fortunes taken out right in the district, not by one, but practically by all mine plants in the last few years? Have you ever had the opportunity to get in on the ground floor of such an investment? At this price the immense profits simply depend on this. Are the facts such as we have stated? Now, this we prove in detail—we will even arrange to take you to see the mine and refer you to any of the responsible property owners, bankers, engineers—in the evidence of surrounding properties; we lay the proposition before your business judgment with the full appreciation that you owe it to yourself to investigate this simply as an investment in a commercial enterprise.

ENGINEER'S REPORT

I have been asked to report on the mine and workings of the Sunburst Mine, a lead and zinc property, located in the Quapaw River basin, Indian Territory, near the town of Baxter Springs, Kansas. The mine is situated on a hillside, and the workings are extensive. The ore is of a high grade, and the mine is well equipped with machinery. The mine is owned by the Sunburst Mining Company, and the report is made for the purpose of showing the value of the property and the potential for future development.

FORMATION.

The mine comes under the blanket formation. Out of the last eleven holes drilled only two holes were a barren of lead or zinc. One of them showing lead and zinc ore in paying quantities. The other hole drilled showed only a few feet of lead ore. The mine is situated on a hillside, and the workings are extensive. The ore is of a high grade, and the mine is well equipped with machinery. The mine is owned by the Sunburst Mining Company, and the report is made for the purpose of showing the value of the property and the potential for future development.

Dividends of 120 Per Cent Are Declared!

Baxter Mining Company, operating in the same district and with the same officers as the Sunburst Company, has declared a dividend of 120 per cent per month. First payment made was Feb. 1st. Your mine is certainly safe in the hands of these successful men and should make you a like profit. Read the following from the Omaha Bee of Feb. 3, 1907:

DIVIDENDS OF BAXTER MINING STOCK

A 10 Per Cent Monthly Dividend has been declared and paid to the fortunate owners of Baxter Mining Company stock. This dividend, we are informed, will be regularly paid on the first of each month. Owners of this stock are to be congratulated. The property of this company lies in the new wonderful lead and zinc district known as the Baxter Spring Camp. The officers are J. P. McCarthy, president, and R. W. Bailey, secretary and treasurer. A number of other Omaha citizens are interested. Regular monthly dividend of 10% for March has been paid.

PROPERTY OF FABULOUS WEALTH

HEMMED IN BY PRODUCING MINES.

Thousands of Dollars Expended on Shafts and Development Work Shows Ore Runs From 8 to 12 Per Cent—While a Yield of 4 Per Cent in Center Creek Mine Has Produced Nearly \$7,000,000.

The increasing demand for lead and zinc in two blocks in need of a full statement. Both metals are in steady demand and are steadily advancing prices. The prices have gone up since 1905 from \$11.22 per ton for lead and \$2.61 for zinc to \$12.00 for lead and \$3.00 for zinc. The lead and zinc industry is now in a position to produce a large amount of the metal. This southwestern district produces 80 per cent of the zinc produced in the United States.

The mining capacity of the Sunburst property, handling ore that averages from 8 to 15 per cent, can be estimated from the production of other companies. The Center Creek Mining Company of Webb City, Mo., from an identical tract, has taken out nearly \$7,000,000 and is still producing.

The report for the year 1904 shows the following production during that year from the several properties mentioned:

Company	Value
American Zinc, Lead & Smelting Co.	\$1,767,000.00
A. W. Taylor	188
The Buxton	57,571.00
The Buxton	188,572.00
Center Creek Mining Co. (production to date)	2,000
Mrs. J. C. Chalmers	129
Consolidated Zinc & Lead Co.	52
Consolidated Zinc Co. (production to date)	209
Consolidated Zinc Co.	19,161.00
Daugherty-Day-McMillan Estate	60
The Empire Zinc Co.	431
Cox-Hors	120,324.00
Granby Mining & Smelting Co., 1905	120,324.00
Granby Mining & Smelting Co., 1906	1,000,000.00
John C. Quinn	8,837.00
Pittsburg-Joplin Lead & Zinc Co.	28,000.00
Pittsburg-Joplin Lead & Zinc Co.	412,200.00
United Zinc Co.	136

BIRD'S EYE VIEW OF PROPERTY.

From the figure it can be seen readily how such large dividends are paid. The Dinger Co. pays 120 per cent. The Chapman 120 per cent, the Oregon 117 per cent, and many others yield enormous returns. These profits are possible because of the concentrated richness of the ore, the fact that it is near the surface, that it requires no expensive machinery, that the buyers come to the mine and take the product right from the mine, that the climate is favorable, that the market is advancing, and the owners of the mine get steadily improving values for their ore produced. This is why lead and zinc mining is the safest and most profitable investment in the world to-day. Do you want 100 per cent or more on your money?

KANSAS CITY POST REPORTS INDORSE SUNBURST PROPERTY

Great public interest has been excited in the Sunburst mine. In response to this demand for exact and reliable information the Kansas City Post has a great metropolitan paper, and it is the only newspaper in the district to report what is actually going on in the mine. The mine is situated on a hillside, and the workings are extensive. The ore is of a high grade, and the mine is well equipped with machinery. The mine is owned by the Sunburst Mining Company, and the report is made for the purpose of showing the value of the property and the potential for future development.

Counsel Peabody Tells How Fight for Property Will Be Pressed
POOR MAN MAY BE GIVEN CHARGE OF VAST FORTUNE

WHO is to control the Eddy millions? The fight for the custody of the fortune which has been accumulated by the founder of Christian Science, began in dead earnest yesterday, when the full scope of the suit brought by Mrs. Eddy's relatives against her advisers was realized. The attacking and the defending forces held conference at which plans were laid for the conduct of the battle which has just begun. Frederick W. Peabody, of counsel for George W. Baker, of Bangor, Me., Mrs. Eddy's nephew, and one of the petitioners, declared last night that some of the most eminent alienists in the United States will be called in to examine Mrs. Eddy and to pass upon her mental condition. He said further that the determination of the petitioners to employ medical men will make it necessary for Mrs. Eddy's advisers, if they hope to retain control of her affairs, to produce testimony of medical men themselves. This recognition which Mr. Peabody said yesterday and her advisers will be forced to make of the utility of doctors would be no stranger than the rise from obscurity and obscurity to affluence which made possible for Baker the suit which he and George W. Glover, Mrs. Eddy's son, and his daughter, Mary Baker (Glover) have brought.

"THIS is the Mrs. Eddy that I saw at noon on October 30, 1906, when I, a newspaper representative, was admitted to an audience with her at Pleasant View for the purpose of disposing of the rumor that another woman had been posing as she during the daily drives that the Eddy carriage made through Concord. 'I never saw Mrs. Eddy before. I have never seen her since. Her appearance on that day was that of a feeble old woman. She was more like an apparition than a human being. Her face was lined and her hair was a mass of white. She was wearing a handsome white velvet coat, a white panne velvet bonnet and a handsome gown with a train. She was heavily veiled. Her appearance before us was arranged with a view to theatrical effect. She looked so feeble and so broken, so much feebler than other women of her age that I have known, that it seemed to be something great and that she should be dressed up so and so exhibited rather than that she should be permitted to spend her days in peace and restfulness.'"

(This is the statement made yesterday afternoon by Eleanor Ames, who was one of the party at the last public appearance of Mrs. Eddy in October. The Sunday American's staff artist drew this picture under her direction.)

Monday is the time to buy your Kitchen Furnishings, not alone because you need them, but on account of this low price sale, absolutely the lowest in New England by actual comparison. If we could tell about all the special bargains arranged for this great Spring Sale we could crowd this basement storehouse tomorrow so that there wouldn't be standing room. We would sell enough merchandise to keep our entire delivery system busy for a week at the prices we are going to ask, but we couldn't tell about all of them unless we used three or four pages in this paper, so we are going to use the following as examples, and let our customers come down to the store to see the other bargains.

TRUSTS HIT BY HEARST BILL.

New York Representative Asks Congress to End Stock Watering.

DEALS BLOW AT CRIME IN BIG CORPORATIONS

Prison Penalty Provided to Stop False Returns by Directors.

VALUE OF PROPERTY MUST BE SWORN TO

State Incorporated Concerns Must Accept National Legislation.

WASHINGTON, March 3.—A bill of far-reaching public importance was introduced into Congress Friday by William Randolph Hearst, entitled "A Bill to Provide for National Incorporation and Control of Corporations Engaged in Commerce Among the Several States."

Representative Hearst has had this measure under consideration for three years past, and the bill represents his carefully matured judgment on a subject of equal importance with his Railroad Rate Regulation bill.

The recent revelations of stock watering and corporate jugglery made in the Harriman-Union Pacific investigation have brought the measure to the front as a focus and imperative enactment of an adequate and comprehensive bill dealing with the subject of national corporation control.

Watered Stocks Cause High Price of Life's Necessaries.

Trained observers find in watered stocks the most powerful factor in the rapid increase of prices of life, high prices being necessary to earn dividends on stock representing no value.

It is equally well understood that the chance of putting out issues of watered stock is a motive that has led to practically every oppressive combination of capital. There is no doubt that the stock market is a place where the most oppressive combinations are formed with no other excuse than for the opportunity afforded of putting out stock of fictitious value.

The evil affects the average business man and small investor quite as much as the consumer, for these stocks are made the basis of Wall Street speculation and the neighbors know both of it and will find it in a store or a house or a piece of land.

Learned to Deceive.

"I have lived here on Twenty street for many years and I have never known a man who was not a liar and a cheat. I have lived here for many years and I have never known a man who was not a liar and a cheat."

"I have lived here for many years and I have never known a man who was not a liar and a cheat. I have lived here for many years and I have never known a man who was not a liar and a cheat."

"Cobalt Mutual"

Advanced 40% in Price on February 20th

ONE month ago I invited you to join me in making a fortune on "Cobalt Mutual" stock. I told you that the price would advance 40% on February 20th. My prediction came true.

Subscriptions for this stock were received from all over the country, from business men, bankers, lawyers, professional men, everyone. The public recognized the fact that the Cobalt Mutual Mines Company was different from any mining proposition ever put before it. It recognized the fact that "Cobalt Mutual" was being handled along business lines—that the men interested in the enterprise had gone into it with the same determination to make a big success for the stockholders that they would have in going into any manufacturing or other enterprise.

BE A RED LEG

Red Leg is a new, exciting, and challenging game that will keep you coming back for more. It's a game of strategy, skill, and luck. The game is played on a board with 100 squares, each with a different color. The goal is to be the first to reach the end of the board. The game is played with two players, one red and one blue. The red player starts on the red square and the blue player starts on the blue square. The game is played by rolling a die and moving the pieces. The first player to reach the end of the board wins. The game is a great way to spend time with friends and family. It's a game that's easy to learn and play, but it's also a game that's full of strategy and skill. So, if you're looking for a new game to play, look no further than Red Leg. It's the game that's been waiting for you.
